

# *IT Support for Financial Technology*

**D**igital Intelligence Systems Corporation (DISYS) is a leading provider of IT-focused consulting services in the financial services industry. For projects at every stage of the systems development life cycle — from development, through production and testing, to maintenance and upgrades — we use our extensive candidate database, vast recruiting network, and rigorous evaluation process to provide the most highly qualified consultants for any requirement.

## **Broad Financial Industry Experience**

Since 1994, DISYS has helped financial institutions apply technology to confront strategic challenges related to compliance, risk management, security, and customer service. Notable among our many customer success stories, we:

- Completed a “Know Your Customer” file remediation for a global financial services provider to mitigate the risk of money laundering and terrorist financing in just 48 hours
- Automated an institution’s loan REMICs process with a more user-friendly web interface
- Provided analysts with expertise in a newly implemented desktop underwriting tool for an internal-facing call center
- Doubled the number of IT placements from 2009 to 2010 working on several projects for a major lending institution

DISYS’ proven capabilities have made us a trusted partner for many leading financial institutions. DISYS recently won a competitive bid from a pool
