

# Infrastructure Support Services

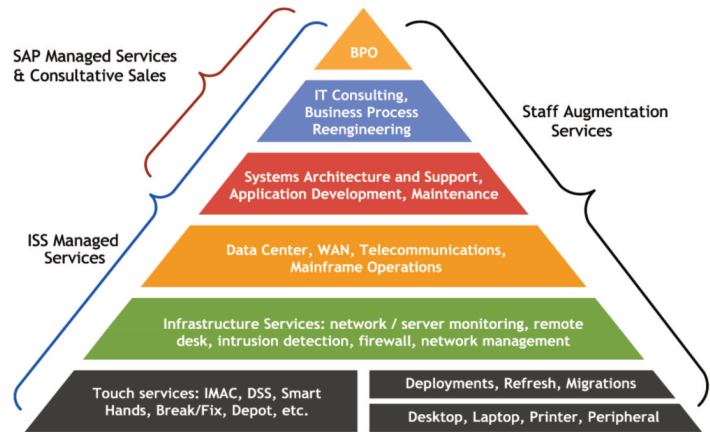

**D**igital Intelligence Systems Corporation (DISYS) offers vendor-independent Infrastructure Support Services which provide end-to-end project based consulting services in the areas of **Network and Telecom, Applications, Security, Data Center/Storage, End-User Computing, and Point-of-Sale (POS)**. DISYS helps global enterprises, government agencies, and organizations of any size to manage and operate their IT systems and services for maximum efficiency, security and economy.

DISYS can assist in developing your statement of work or proposal and design your portfolio of systems and applications to ensure they align with your business goals.

Our approach applies our knowledge of industry best practices, ability to listen to business-line employees, and in-depth understanding of architectures and tools. Our experience, agnostic service offerings, and quality assured processes assure you we'll get it right the first time.

## End-to-end Enterprise Support and Managed Services:

- Portfolio, Program, and Project Management
- Enterprise Application Management
- Comprehensive Security Assessment
- Migrations and Upgrades
- Asset Management
- Data Center Consolidations
- Storage Assessments and Migrations
- Deployments
- Architecture, Design, and Implementation
- Installation, Configuration, and Customization

***“Our extensive and proven experience and quality assured processes assure you we’ll get it right — the first time.”***

- Virtualization – Data Center, Applications, and Desktop

## Right-Sized Engagements and Pricing

DISYS provides Infrastructure Support Services through a variety of flexible pricing models that meet our constituents’ business needs.

Engagement options include: Managed Services – with DISYS responsible for Service Level Agreements; Program Management – scheduling, and overall contractual deliverables; Staff Augmentation – in which our consultants support your self-managed IT programs; or a Project approach – combining project-based delivery and overall program oversight. Our flexible transactional (price-per-event), hourly or fixed price options provide the services you need at predictable and competitive rates.
