

# DISYS

## Run SAP Certification

As one of only nine North America companies certified in Run SAP Implementation, we have core capabilities in delivering services across the entire SAP Business Suite.

### The Run SAP Methodology

- Improves operational efficiencies and lower costs by creating standards and unifying processes for transparency in operations, risk mitigation, and reduced downtime
- Employs best-practice procedures, content, services, training and tools to offer a full range of end-to-end SAP solution operations
- Includes a standardized implementation method to deliver effective results, focused on application management, business process operations, and administration of SAP solutions
- Provides SAP best practices for all phases of your SAP solution lifecycle combined with ASAP Implementation or Upgrade Methodology

### Benefits of the Run SAP Methodology

- Enterprise-level, service oriented architecture (enterprise SOA) tailored to your unique set of challenges and goals. Comprehensive support structure to maximize SOA functionality while reducing time, effort, and cost
- Increased connectivity and transparency between system landscapes, centralized change management, and a clearly defined change processes utilizing SAP Solution Manager

- Enables new functionalities in SAP Solution Manager (Root Cause Analysis, Change Control Management and Monitoring, end-to-end Business Process Integration and Automation, Test Management, etc.) to deliver best-in-class customer solution operations
