

DISYS SAP Consulting

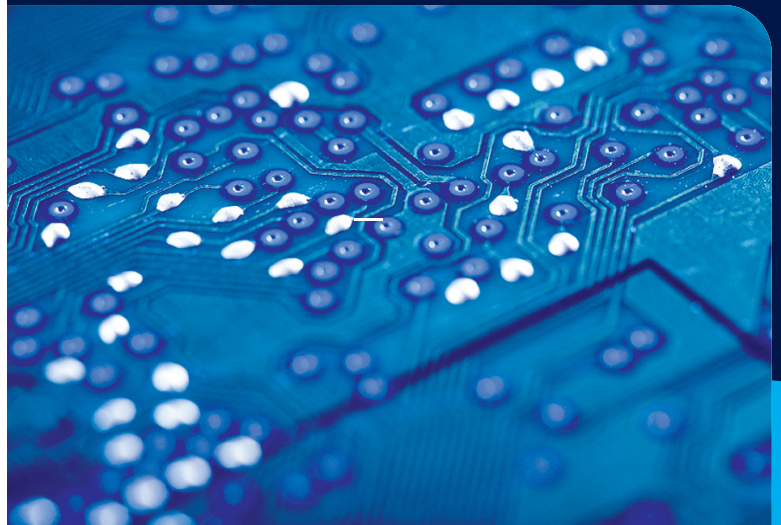

As an SAP Services Partner, and one of only nine North America companies to become an SAP Certified Run SAP Implementation Partner, Digital Intelligence Systems Corporation (DISYS) has core capabilities in delivering SAP Services across the entire SAP Business Suite:

- **Implementations and Rollouts** – including global templates implementations and rollouts, custom development, interfaces, training and documentation
- **Enhancements and Upgrades** – to help you take advantage of new technologies and Functionality – Free Upgrade Analysis Workshops, Cost Analysis, Technical and Functional Upgrades, Delta, and User Training
- **Quality Assurance and Testing** – automated, manual, and performance testing, using best practice tools and methodologies
- **Production Support and Maintenance** – from help desk to performance tuning to archiving, Functional and Technical Support, Basis and Security Administration, and Custom ABAP Development
- **Mergers, Acquisitions and Instance Consolidation** – Technical integration recommendations and execution on how to consolidate multiple systems, retire legacy applications, and increase efficiency and productivity

Trust Our Experience in SAP

DISYS offers the know-how and experience of over 500 senior-level SAP experts across the U.S. and around the world. Since 2001, these experts have completed successful SAP projects for Fortune 500 corporations, government agencies, and other customers in multiple industries:

- **Rail transportation company** – ABAP development and functional support for Human Capital Management modules

“DISYS offers the know-how and experience of over 500 senior-level SAP experts.”

- **Software development company** – Implementation of Business Process Management with integration to Solution Manager and AlarmPoint
- **Global oil and gas corporation** – \$1.5 billion rollout spanning seven countries; analysis, technical design, and documentation of a custom CRM solution; plus replacement of U.S. instance for worldwide consistency
- **Global security company** – Fixes, enhancements, and regression testing to support SAP and iBuy Supply Chain projects and initiatives
- **Snack and beverage producer** – Testing of global SAP implementation including new releases, legacy operations and infrastructure
