

# DISYS PROJECT MANAGEMENT OFFICE

DISYS provides the structure, governance, and discipline needed to keep project managers focused on the client mission, objectives and deliverables.

DISYS is an end-to-end complete PMO solution provider that incorporates processes and proven delivery methods to develop custom project and program management solutions to solve complex IT challenges. Our flexible and modular approach allows us to deliver customized solutions to your unique project needs and requirements.

## DISYS PMO Solutions include:

- Development of common methodologies and templates
- Training and mentoring for rapid adoption of project management methodologies and processes
- Improved communication between project team and stakeholders
- Better knowledge sharing
- Improved management of project issues and risks
- Better management of project scope
- Improved quality of project deliverables
- Improved predictability of project costs and resource demands

## Trust Our Project Management Experience

DISYS has knowledgeable and experienced solution providers with extensive subject matter expertise that can provide custom-built solutions following established frameworks. Through an extensive network of domestic and international locations, DISYS has the ability to provide on-site, remote, off-shore or near-shore PMO capabilities and support to meet unique client needs.

### Advantages:

- Custom-built solutions based on industry best practices
- Experienced and knowledgeable solution providers
- Improved productivity and accuracy

### Industries Served:

- Consumer Goods, Energy and Utility, Healthcare, Life Sciences, Defense and Security, Technology, Telecommunications, Financial Services, Oil & Gas, and Transportation

## Save Time and Improve Quality

- Saves time by using standard templates, methods and processes for common project management activities
- Reduces cost by providing resources, training and tools to project managers and project staff
- Reduces time and cost by developing reusable and repeatable methods, templates and tools
- Improves quality by reviewing project artifacts and deliverables
- Improves reliability by validating and reviewing schedule, risk registry, baseline, critical path, budget and resource allocation
