

**INDUSTRY:** Energy

**DISYS SERVICE:** Infrastructure Asset Relocation  
& Configuration

**COMPANY:** One of the world's largest publicly-traded international oil and gas companies

## BUSINESS CHALLENGE

- Relocate 12,000 users from 32 offices across the country to a centralized campus in Texas.
- Accommodate timing of lease expirations and sale of office buildings
- Accommodate construction schedules
- Aggressive user move schedules needed
- Reduce current attrition rate of 35%

## THE DISYS SOLUTION

- DISYS broke project into three phases: Preparation/Planning, Execution and Closeout.
- Detailed planning and test verification of all assumptions to solidify confidence in execution
- Successful adoption of safety culture and standards
- Continuous open communication with all stakeholders

## RESULTS & BENEFITS

- Anticipate a reduction in attrition by 24%
- Completed 46 move weekends
- Connected 12,696 desktops
- Reduced training costs
- According to the client's IT group, DISYS established new guidelines and standards for setup and appearance
- Out of 12,000 units, DISYS reported a less than 1% incident rating
- Saved client more than \$500,000 in project overhead from project inception to conclusion
