

ENERGY CAPABILITIES

As our longest-established area of expertise, DISYS is helping the oil and gas industry traverse energy diversification by implementing solutions that preserve profitability while creating long-term, sustainable outcomes for the future.

In the Energy Industry, DISYS Specializes In:

- Business Transformation
- Business Intelligence/Data Analytics
- Enterprise Resource Planning Systems
- Infrastructure Support Systems (ISS)

FOR OUR ENERGY CLIENTS, DISYS IS SOLVING THE FOLLOWING CONCERNS:

OPERATIONAL EFFICIENCY

Global process optimization through deployment of digital and mobile productivity tools and solutions. Centralized project management through DISYS' proprietary CDMS tool offers improved management and support of dispersed implementation teams and ensures issue-free project delivery.

TRANSFORMATION

Business transformation models that combine process integration, optimized resource management and low-risk project rollout. Diverse pricing models offer clients the ideal mix of low-risk, speedy implementation and cost containment.

ORGANIZATION CONSOLIDATION

Technology and asset relocation and support services for global and domestic relocation activities using our Datacenter Operations Framework. 100% adherence to critical safety guidelines resulting in zero productivity loss for touch-labor services.

INCREASED CUSTOMER ENGAGEMENT

Our Mobile Development Library enables app development that puts utility consumption and optimization efforts in consumer hands. Business Intelligence solutions that provide in-depth insight into consumer behavior – enabling the refinement of consumer marketing and acquisition efforts.

ACCELERATING PRODUCTIVITY:

DISYS is committed to accelerating productivity and increasing efficiency for our clients. See how we have done so with our Diversified Manufacturing & Logistics clients by downloading the following case studies on DISYS.com:
