

HIGH TECH & TELECOMM SERVICES

DISYS is on the pulse of critical advances in Software Defined Networking, Full Stack Engineering, and the Internet of Things – and is rapidly becoming a lead proponent of open-network solutions to increase value and reduce reliance on hardware.

In High Tech & Telecommunications, DISYS Specializes In:

- Application Development
- Project Management (PMO)
- Testing & Automation
- Infrastructure Support Systems (ISS)

FOR HIGH TECH & TELECOMM CLIENTS, DISYS IS SOLVING THE FOLLOWING CONCERNS:

SCALABILITY

The latest frontier in technology – said to have industry impact as large as the invention of the PC – DISYS’ software-defined infrastructure solutions reduce reliance on hardware/software coupling and make way for modular, programmable open networks.

INCREASING VALUE EXPECTATIONS

New and dynamic application development is improving customer engagement and increasing product and service value. DISYS’ is developing intelligent APIs to optimize application consumption.

COST PERFORMANCE LEADERSHIP

DISYS is helping our Telecommunications clients improve cost performance by reducing truck rolls by as much as 50% by deploying mobile application components from our Mobile Development Library such as customized data views and location-enabled functions.

CROSS-PLATFORM EFFICIENCIES

DISYS’ rapid mobile application development expertise and proprietary CDMS project execution platform is enabling clients to deploy iOS-, Android- and Microsoft Windows-enabled solutions in line with competitive product launch dates dominating today’s landscape.

ACCELERATING PRODUCTIVITY:

DISYS is committed to accelerating productivity and increasing efficiency for our clients. See how we have done so with our High Tech & Telecomm clients by downloading the following case studies on DISYS.com:
