

**INDUSTRY:** Transportation

**DISYS SERVICE:** Cloud Services

**COMPANY:** The nation's largest passenger rail carrier

## BUSINESS CHALLENGE

- In an effort to improve efficiency and lower costs, the client decided to move the bulk of its data storage and computing requirements to the Cloud
- The client sought a long-term partner with the expertise and bandwidth to understand its existing IT landscape and map and execute a successful transition of legacy systems and applications to the Cloud

## THE DISYS SOLUTION

- **Team Size:** TBD
- **Technical skillsets/Technologies used:** Amazon Web Services (AWS), Maximo
- Develop and execute a complex, yet functional Cloud transition solution for the client
- Provide an integrated Cloud solution that accounts for Legacy systems and maintains their functionality as well as the integrity of the data contained therein

## RESULTS & BENEFITS

- **Reduced IT maintenance costs to the client due to virtualized environment**
- **Reliable, unitary repository for the client's data and applications**
