

**INDUSTRY:** High Tech

**DISYS SERVICE:** Intelligent Process Engineering, Automation

**COMPANY:** Digital Intelligence Systems, LLC (DISYS) is a leading staffing & global services provider with 33 offices worldwide

## BUSINESS CHALLENGE

- DISYS found that its transition to a new internal system led to misidentification of unprocessed HR records, which delayed processing
- The company needed a seamless way to migrate new-hire data from a custom system into PeopleSoft, while adhering to more than 100 business rules
- DISYS needed a error-proof solution that would continuously scan the custom system for changes and trigger a PeopleSoft migration, guided by specific business rules

## THE DISYS SOLUTION

- Analyze the current process and create a Business Case Analysis
- Generate in-depth reports, outlining client's ROI
- Determine feasibility of automating the process through RPA
- Reimagine the process through creation of a BOT with strict rules to perform repeatable tasks, error-free and in a timely fashion

## RESULTS & BENEFITS

With its expertise in RPA, DISYS developed a bot that achieved:

- A savings of more than 1,100 Man hours per month through automation implementation
- A reduction in errors by 95%
- Costs savings of more than 75%
- Detailed reports on daily activity of decommission process
- Complete ROI within 4 months
