

INDUSTRY: Manufacturing

DISYS SERVICE: Amazon Web Services, Cloud

COMPANY: A leading provider of metal packaging for beverages, foods and household products, and of aerospace and other technologies and services to commercial and governmental customers.

BUSINESS CHALLENGE

- The client had implemented various digital marketing platforms for each of their business units. The client wanted to:
 - Consolidate all systems into one, easily managed in a central location
 - Create a versatile platform for digital marketing allowing for use across multiple organizations, regardless of geographic location
 - Implement operational efficiency by anticipating future needs & flexibility

THE DISYS SOLUTION

- DISYS created a system from the ground up, with consideration of best practices
- Careful IT security protocols were put into place, due to the client's services to the federal government
- Determined Amazon Web Services (AWS) slicing capabilities were best fit, leveraging services like VPC, Subnets, Network Access Control and Security Groups to isolate specific needs & qualifications
- Achieves required levels of service availability, spanning multiple zones & the use of SQL mirroring

RESULTS & BENEFITS

- DISYS deployed a unified corporate website & versatile digital marketing platform that:
 - Reduced the need for multiple, cross functional platforms
 - Increased cost efficiency & security
 - Can be accessed anytime, anywhere regardless of geographical location
 - Provides increased data availability & precise recovery upon system failure
