

INDUSTRY: High Tech

DISYS SERVICE: Managed Services & AWS Platform

COMPANY: a leading technology company that works across the office of the CFO focusing on financial systems and information; from strategy to reporting and analytics, to consolidation and budgeting/forecasting.

BUSINESS CHALLENGE

- The client was dealing with heterogeneous environments operating in different Amazon Web Service (AWS) regions These practices resulted in:
 - Impeding changes and transformations
 - Difficult unified monitoring, change management, alerting and notification management
 - Long on-boarding cycles taking up to 3 months to complete

THE DISYS SOLUTION

- To improve time to market, DISYS provided augmented technology team experts in cloud engineering & managed services
- Provide ongoing support for architecture, recommendations, policy guidelines & more
- Reduce manual processes, enabling rapid environment & application stack provisioning
- Allow for comprehensive monitoring solutions using Nagios to monitor infrastructures, business critical backend operations

RESULTS & BENEFITS

- Through its implementation, DISYS decreased the client's onboarding time from 3 months to 2 weeks
- To achieve Service Organization Controls (SOC) compliance, DISYS greatly improved security and audit measures
- Improved quality of operations through a unified approach for monitoring, access controls, security and team collaboration
